SKILLS

- **Languages:** Python, R, C, C++, Java, Racket
- **Web:** HTML, CSS, JavaScript, TypeScript, React
- **Data & Statistics:** pandas, NumPy, statsmodels, SQL, PostgreSQL
- **Tools:** Linux, Git

EDUCATION

University of Waterloo

Bachelor of Mathematics in Data Science

September 2024 – April 2029

GPA: 3.6/4.0

EXPERIENCE

University of Waterloo, Department of Systems Design Engineering

Research Assistant, Transportation Systems

January 2026 – April 2026

Waterloo, ON

- Processed and validated a 700+ respondent EV charging survey dataset for analysis, resolving data quality issues and standardizing variables across subsets for statistical modeling
- Investigated key drivers of EV charging behaviour through statistical analysis to validate and refine model assumptions
- Developed and validated discrete choice models to predict EV driver charging decisions, quantifying the effects of price, charger power, and trip characteristics on charging likelihood
- Optimized a single-day EV charging simulation from ~25 minutes to under 1 minute to enable rapid parameter iteration, then extended it into a multi-day convergence loop while maintaining sub-minute performance

WE Accelerate: Microsoft Azure & AI Stream

Relief Buddy Project Team Member

May 2025 – August 2025

Remote

- Identified and analyzed key industry challenges to develop actionable client recommendations, delivering a comprehensive final report to the project client
- Utilized cloud and AI concepts learned from Microsoft AZ-900 and AI-900 certifications to propose new technical solutions, contributing to the final report to the client
- Led a virtual team presentation of key research findings using PowerPoint, leading to a successful final demonstration

Electrium Mobility

Firmware Team Member

September 2024 – April 2025

Waterloo, ON

- Developed a user interface in C with LVGL for a bike computer, implementing button-based screen interactions within the ESP-IDF framework to deliver a functional user experience
- Designed, assembled and troubleshooted hardware prototypes, applying microcontrollers, wiring, and breadboards for rapid electronic prototyping
- Streamlined development workflow by implementing GitHub for version control, ensuring efficient collaboration, code management, and documentation across the project lifecycle

Kumon Canada, Inc.

Marking Assistant

December 2020 – June 2024

Markham, ON

- Mentored students by balancing guidance with independent work, promoting problem-solving skills and independent learning
- Tracked and analyzed student performance data to identify learning challenges and communicated findings to senior staff, contributing to a data-driven approach for student improvement

CERTIFICATIONS

- **Microsoft Certified: Azure AI Fundamentals** June 2025
- **Microsoft Certified: Azure Fundamentals** June 2025
